STAGE 1 (COMPULSORY)

AIM: to identify those individuals with a known disease, or signs or symptoms of disease, who may be at a higher risk of an adverse event during physical activity/exercise. This stage is self administered and self evaluated.

			Please circle response	
1.	Has your doctor ever told you that you have a heart condition or have you ever suffered a stroke?	Yes	No	
2.	Do you ever experience unexplained pains in your chest at rest or during physical activity/exercise?	Yes	No	
3.	Do you ever feel faint or have spells of dizziness during physical activity/exercise that causes you to lose balance?	Yes	No	
4.	Have you had an asthma attack requiring immediate medical attention at any time over the last 12 months?	Yes	No	
5.	If you have diabetes (type I or type II) have you had trouble controlling your blood glucose in the last 3 months?	Yes	No	
6.	Do you have any diagnosed muscle, bone or joint problems that you have been told could be made worse by participating in physical activity/exercise?	Yes	No	
7.	Do you have any other medical condition(s) that may make it dangerous for you to participate in physical activity/exercise?	Yes	No	
	IF YOU ANSWERED 'YES' to any of the 7 questions, please seek guidance from your GP or appropriate allied health professional prior to undertaking physical activity/exercise			
	IF YOU ANSWERED 'NO' to all of the 7 questions, and you have no other concerns about your health, you may proceed to undertake light-moderate intensity physical activity/exercise			

I believe that to the best of my knowledge, all of the information I have supplied within this tool is correct.

EXERCISE INTENSITY GUIDELINES

INTENSITY CATEGORY	HEART RATE MEASURES	PERCEIVED EXERTION MEASURES	DESCRIPTIVE MEASURES			
SEDENTARY	< 40% HRmax	Very, very light RPE [#] < 1	• Activities that usually involve sitting or lying and that have little additional movement and a low energy requirement			
LIGHT	40 to <55% HRmax	Very light to light RPE [#] 1-2	 An aerobic activity that does not cause a noticeable change in breathing rate An intensity that can be sustained for at least 60 minutes 			
MODERATE	55 to <70% HRmax	Moderate to somewhat hard RPE [#] 3-4	 An aerobic activity that is able to be conducted whilst maintaining a conversation uninterrupted An intensity that may last between 30 and 60 minutes 			
VIGOROUS	70 to <90% HRmax	Hard RPE [#] 5-6	 An aerobic activity in which a conversation generally cannot be maintained uninterrupted An intensity that may last up to about 30 minutes 			
HIGH	≥ 90% HRmax	Very hard RPE [#] ≥ 7	 An intensity that generally cannot be sustained for longer than about 10 minutes 			
# = Borg's Rating of Perceived Exertion (RPE) scale, category scale 0-10						

	ADULT PRE-EXERCIS	SE SCREENING TOOL		
	STAGE 2 (C	OPTIONAL)		
Name	2:			
Date	of Birth: Date:			
	To identify those individuals with risk factors or other c tage is to be administered by a qualified exercise profe	conditions to assist with appropriate exercise prescription.		
		RISK FACTORS		
1.	Age			
	Candar	≥ 45yrs Males or ≥ 55yrs Females +1 risk factor		
	Gender			
2.	Family history of heart disease (eg: stroke, heart	If male $< 55yrs = +1$ risk factor		
	attack) Relative Age Relative Age	If female $< 65yrs = +1$ risk factor		
	Father Mother	Maximum of 1 risk factor for this question		
	Brother Sister —	question		
3.	Son Do you smoke cigarettes on a daily or weekly basis or	If yes, (smoke regularly or		
5.	have you quit smoking in the last 6 months? Yes No	given up within the past 6 months)		
	If currently smoking, how many per	= +1 risk factor		
	day or week?			
4.	Describe your current physical activity/exercise levels:	If physical activity level < 150 min/ week = +1 risk factor		
	Sedentary Light Moderate Vigorous	If physical activity level		
	equency	\geq 150 min/ week = -1 risk factor		
	ions per week	(vigorous physical activity/ exercise		
	utes per week	weighted x 2)		
5.	Please state your height (cm)			
	weight (kg)	$BMI = \underline{\qquad}$ BMI \ge 30 kg/m ² = +1 risk factor		
6.	Have you been told that you have high blood pressure? Yes No	If yes, = +1 risk factor		
7.	Have you been told that you have high cholesterol?			
	Yes No	If yes, = +1 risk factor		
8.	Have you been told that you have high blood	If yes, = +1 risk factor		
	sugar? Yes No			
note	: Refer over page for risk stratification.	STAGE 2 Total Risk Factors =		

9.	Have you spent time in hospital (including day admission) for any medical condition/illness/injury during the last 12 months? Yes No	If yes, provide details
10.	Are you currently taking a prescribed medication(s) for any medical conditions(s)? Yes No	If yes, what is the medical condition(s)?
11.	Are you pregnant or have you given birth within the last 12 months? Yes No	If yes, provide details. I am months pregnant or postnatal (circle).
12.	Do you have any muscle, bone or joint pain or soreness that is made worse by particular types of activity? Yes No	If yes, provide details

STAGE 3 (OPTIONAL)

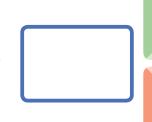

AIM: To obtain pre-exercise baseline measurements of other recognised cardiovascular and metabolic risk factors. This stage is to be administered by a qualified exercise professional. (Measures 1, 2 & 3 – minimum qualification, Certificate III in Fitness; Measures 4 and 5 minimum level, Exercise Physiologist*).

	RESULTS		RISK FACTORS
1. BMI (kg/m ²)		BMI \ge 30 kg/m ² = +1 risk factor	
2. Waist girth (cm)		Waist > 94 cm for men and > 80 cm for women = +1 risk factor	
3. Resting BP (mmHg)		SBP ≥140 mmHg or DBP ≥90 mmHg = +1 risk factor	
4. Fasting lipid profile*		Total cholesterol \geq 5.20 mmol/L = +1 risk factor	
Total cholesterol		HDL cholesterol >1.55 mmol/L = -1 risk factor	
HDL		HDL cholesterol < 1.00 mmol/L = +1 risk factor	
Triglycerides		Triglycerides \geq 1.70 mmol/L = +1 risk factor	
LDL		LDL cholesterol \ge 3.40 mmol/L = +1 risk factor	
5 Fasting blood glucose*		Fasting glucose \geq 5.50 mmol = +1 risk factor	

STAGE 3 Total Risk Factors =

RISK STRATIFICATION

Total stage 2 or Total stage 3 Plus stage 2 (Q1 - Q4)

≥ 2 RISK FACTORS – MODERATE RISK CLIENTS

Individuals at moderate risk may participate in aerobic physical activity/exercise at a light or moderate intensity (Refer to the exercise intensity table on page 2)

< 2 RISK FACTORS – LOW RISK CLIENTS

Individuals at low risk may participate in aerobic physical activity/exercise up to a vigorous or high intensity (Refer to the exercise intensity table on page 2)

Note: If stage 3 is completed, identified risk factors from stage 2 (Q1-4) and stage 3 should be combined to indicate risk. If there are extreme or multiple risk factors, the exercise professional should use professional judgement to decide whether further medical advice is required.
